Inground Post/Mount Installation

STEP: 1

DO <u>NOT</u> CEMENT POSTS/MOUNTS INTO PLACE UNTIL THE ENTIRE STRUCTURE IS ASSEMBLED.

Refer to the General Installation guide footing size information and digging proper holes for the support posts/mounts.

4.5-inch Clamp Installation Examples

The following two pages will include examples of how to install some of the most common types of Clamps that are present on our structures that use 4.5-inch outside diameter posts. The structure that you are assembling might not require all the types of clamps listed in these examples.

The Install Guides for specific components that come later in this document might call for a specific type of clamp (a tube clamp for example), those sections will not include detailed instructions for the clamps and should direct you back to this section for more detailed information.

4.5-inch Flat Clamp Installation Example

Connect half of the flat clamp to the component using one (1) M8*30 bolt and Lock Nut. Then, using the other half of the flat clamp and the hardware provided in the clamp hardware bag, attach the backside of the flat clamp around the post.

4.5-inch Clamp Installation Examples

4.5-inch Tube Clamp Installation Example

Insert Bar on Component into one half of the Tube Clamp and attach with M4*25 Set Screw. Then, using the other half of the tube clamp and the hardware provided in the clamp hardware bag, attach the backside of the tube clamp around the post.

4.5-inch Double Slide Clamp Installation Example

Connect half of the double slide clamp to the double slide hood using one (1) M8*30 bolt. Then, using the other half of the clamp and the hardware provided in the clamp hardware bag, attach the backside of the double slide clamp around the post.

Get Physical Series – Standard Attachment Point Installation

Most components of a Get Physical series structure attach using this standard attachment point. Use three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts.

STEP: 2

Each of these attachment points has a rubber cover to protect the bolts. Attach the cover and secure using the pre-attached M8*40 bolt and M8 lock nut.

4.5-inch 4-foot Transfer Station Install

STEP: 1

Connect half of a tube clamp to the ADA transfer handrail using one (1) M4*25 self-tapping screw. Set the handrail into place, then attach the second half of the clamp using the hardware provided in the clamp bag. Repeat this process for the other handrail.

STEP: 2

Using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts, attach the top of the stairs to the half hex deck. Then using four (4) M10*30 bolts, eight (8) M10 washers, and four (4) M10 lock nuts, attach the handrail to the bottom of the stairs. Then, using two (2) M10*25 bolts, four (4) M10 washers, and two (2) M10 lock nuts, attach the handrails to the deck.

Inclined Bones Bridge Install

STEP: 1

Using four (4) M10*30 bolts, eight (8) M10 washers, and four (4) M10 lock nuts, attach each bottom bones bridge to the proper decks.

STEP: 2

Once the bridge is attached, connect half of each 4.5-inch tube clamp to the bridge handrail using one (1) M4*25 self-tapping screw. Then, using two (2) M10*25 bolts, four (4) M10 washers, and two (2) M10 lock nuts, attach the bottom of the bridge handrails to the deck. Repeat these steps for the remaining bones bridges and bridge handrails.
