SportsPlay 501-119 Quad Climber Specifications

The Quad climber shall be constructed out of four 2' wide, curved 1 7/8" 13 gauge pipe ladders with 1" OD 14 gauge rungs, which meet at a 6' height. This allows access to a 1 7/8" OD 13 gauge slide pole. Height to top of slide pole is 11'6". Length of climber is 9'4".

The pipe is produced in a patented in-line triple zinc flo-coating process that provides a smooth shiny uniform appearance with up to 25% greater corrosion resistance than galvanized schedule 40 pipe, along with greater strength and lighter weight for comparable sizes.

Hardware shall be zinc plated button head nuts and bolts with steel socket set screws and lock washers.

Powder coated with polyester paint that has been electrostatically applied and oven cured.
