

CLIMBING WALL INSTALLATION INSTRUCTIONS

- 1) Pick location for climbing wall (level is possible)
- 2) Using a mallet or hammer, beat the ground stakes through the brackets hole on the base of the toy into the ground.
- 3) There should be 2 brackets on each climbing wall one on each end opposite sides.

FOR PERMAENT INSTALLATION

- 1) Pick location of toy (level is possible)
- 2) Mark where the eye hole in bracket is from the base to the ground below.
- 3) Dig a 10" round hole, 18" deep where you have marked
- 4) Fill holes $\frac{3}{4}$ full of mixed concrete
- 5) Put climbing wall back in place and push provided stakes into the wet concrete.
- 6) Allow 24 hours to dry.
- 7) Backfill the holes with the leftover dirt.

Photo of the bracket with the eye holes is below. Insert stakes through the hole. It will come in color of climbing wall
