Inground Post/Mount Installation

STEP: 1

DO <u>NOT</u> CEMENT POSTS/MOUNTS INTO PLACE UNTIL THE ENTIRE STRUCTURE IS ASSEMBLED.

Refer to the General Installation guide footing size information and digging proper holes for the support posts/mounts.

3.5-Inch Clamp Installation Examples

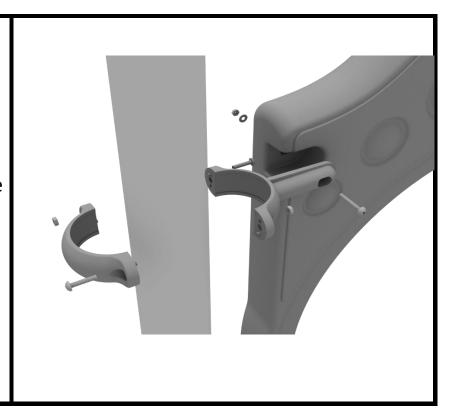

The following three pages will include examples of how to install some of the most common types of Clamps that are present on our structures that use 3.5-inch outside diameter posts. The structure that you are assembling might not require all the types of clamps listed in these examples.

The Install Guides for specific components that come later in this document might call for a specific type of clamp (a tube clamp for example), those sections will not include detailed instructions for the clamps and should direct you back to this section for more detailed information.

3.5-inch Flat Clamp Install Example

Connect half of the flat clamp to the component using one (1) M8*40 bolt. Then, using the other half of the flat clamp and the hardware provided in the clamp hardware bag, attach the backside of the flat clamp around the post.

3.5-Inch Clamp Installation Examples

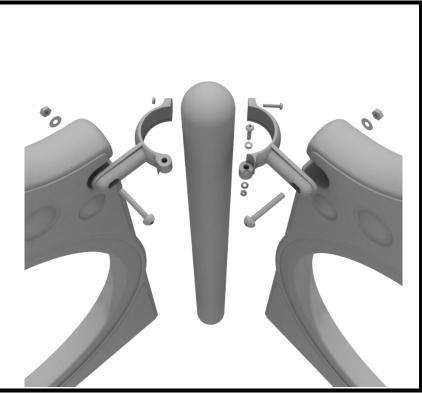

3.5-inch Tube Clamp Install Example

Connect half of the clamp to the component using one (1) M8*30 bolt. Then, using the other half of the tube clamp and the hardware provided in the clamp hardware bag, attach the backside of the tube clamp around the post.

3.5-inch 90-Degree Flat Clamp Install Example

Connect half of the flat clamp to one panel using one (1) M8*40 bolt. Then, using the other half of the flat clamp and the hardware provided in the clamp hardware bag, attach the other half of the tube clamp around the post. Then, attach the next panel to the other side of the clamp using the same process.

48" Transfer Station (3.5" post) Installation

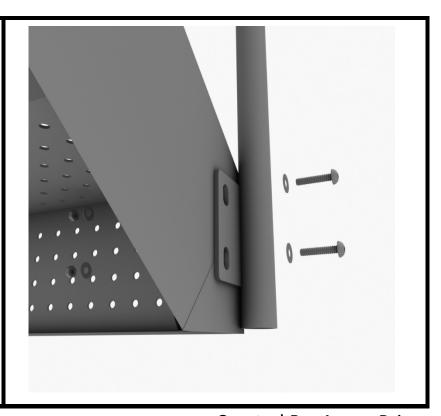

STEP: 1

Connect the 4-foot Transfer
Handrails to the designated posts
using four (4) tube clamps, and four
(4) M8*30 bolts. Using three (3)
M10*25 bolts, six (6) M10 washers,
and three (3) M10 lock nuts, attach
the top of the stairs to the deck. See
the general installation guide
regarding footing information for the
handrail and set them into the
ground.

STEP: 2

Using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts, attach the top of the stairs to the deck. Then using four (4) M10*30 bolts, eight (8) M10 washers, and four (4) M10 lock nuts, attach the handrail to the bottom of the stairs.

4-foot Transfer Station Installation

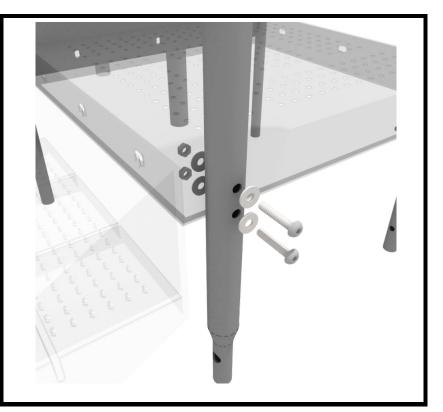

STEP: 3

Using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts, attach the ADA transfer deck to the base of the 4-foot ADA transfer stair.

STEP: 4

See general installation guide regarding footing information for the transfer deck handrail & mount.
Using two (2) M10*65 bolts, four (4) M10 washers, and two (2) M10 lock nuts, attach the transfer handrail to the ADA transfer deck.

Square Deck Installation

STEP: 1

After the posts are in place, using four (4) M10*35 Bolts, eight (8) M10 Washers, and four (4) M10 Lock Nuts, attach each square deck to each pre-attached deck clamp as shown in the image.

Deck clamps are pre-attached to the posts and should not be altered in any way.

Mini Arch Bridge Installation

STEP: 1

Attach the Mini Arch Bridge to the proper decks using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts for each deck.

STEP: 2

Then, once the bridge is in place, attach the Arch Bridge handrails to the posts using four (4) tube clamps, and four (4) M8*30 bolts. Then, attach the bottom of the handrails to the decks using one (1) M10*25 bolt, two (2) M10 washers, and one (1) M10 lock nut for each attachment point.

Bones Bridge Installation

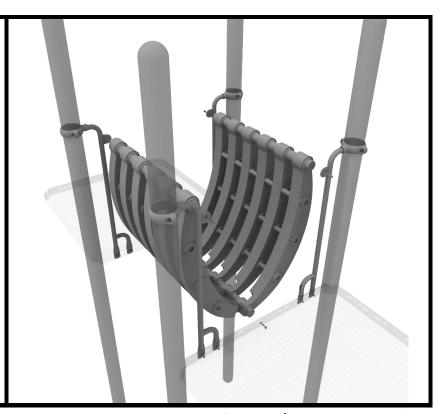

STEP: 1

Attach each bones bridge rail to the proper deck slot using two (2) M10*25 bolts, two (2) M10 washers, and two (2) M10 lock nuts. Then, attach the top of rails to each post using one (1) tube clamp, and one M8*30 bolt.

STEP: 2

Once the rails are attached, detach and set aside the pre-attached hardware on the bottom of the bones bridge. Attach the bottom of the bones bridge to each deck using one (1) M10*30 bolt, one (1) M10 spring gasket, and one (1) M10 washer. Then, attach the top of the bones bridge to each rail using one (1) M10*30 bolt, one (1) M10 spring gasket, and one (1) M10 washer.

4-foot Left Turn Slide Installation

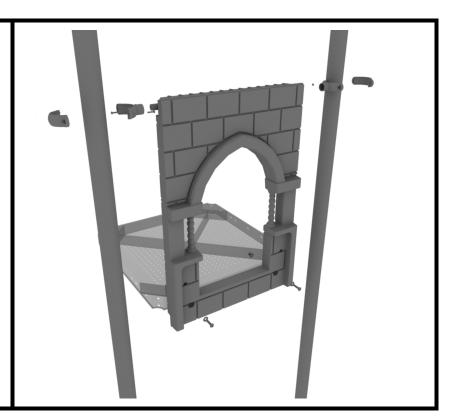

STEP: 1

Take one (1) 3.5-Inch tube clamp, and loosely attach it around a post using the bolts and nuts provided in the clamp hardware bag. Repeat this process on the other post.

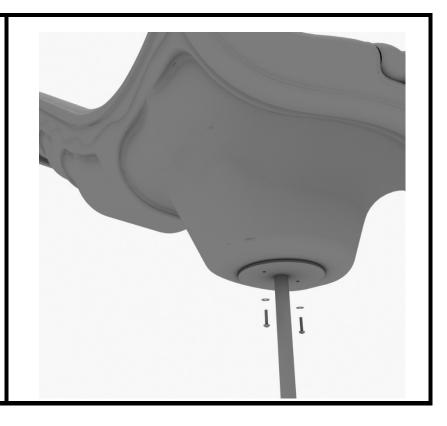

Then, use one (1) M8*40 bolt, one (1) M8 washer, and one (1) M8 lock nut for each connection point.

Leave bolts loose until slide is in place.

STEP: 2

See general installation guide regarding footing information for the slide end mount. Using two (2) M8*20, two (M8) spring washers. And two (2) M8 washers, attach the slide to the slide support post.
