3.5-inch Clamp Installation Examples

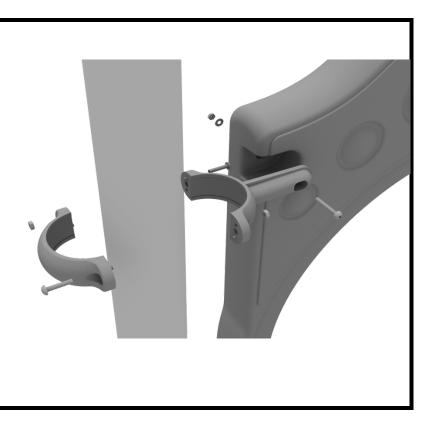

The following three pages will include examples of how to install some of the most common types of Clamps that are present on our structures that use 3.5-inch outside diameter posts. The structure that you are assembling might not require all the types of clamps listed in these examples.

The Install Guides for specific components that come later in this document might call for a specific type of clamp (a tube clamp for example), those sections will not include detailed instructions for the clamps and should direct you back to this section for more detailed information.

3.5-inch Flat Clamp Install Example

Connect half of the flat clamp to the component using one (1) M8*40 bolt. Then, using the other half of the flat clamp and the hardware provided in the clamp hardware bag, attach the backside of the flat clamp around the post.

3.5-inch 90-Degree Flat Clamp Install Example

Connect half of the flat clamp to one panel using one (1) M8*40 bolt. Then, using the other half of the flat clamp and the hardware provided in the clamp hardware bag, attach the other half of the tube clamp around the post. Then, attach the next panel to the other side of the clamp using the same process.

Dig proper holes for the 3.5-inch support posts, and cement them into the ground. Refer to the General Information Guide footing information.

STEP 2

Attach the first half of the 3.5-inch tube clamp to the talk tube post by sliding the end of the clamp over the nob extending from the talk tube post.

STEP 4

Connect the corrugated tubing to the end of one talk tube post using the provided hose clamp. Repeat this process for the other talk tube post. The corrugated tube should be laid out as straight as possible to ensure best sound quality.

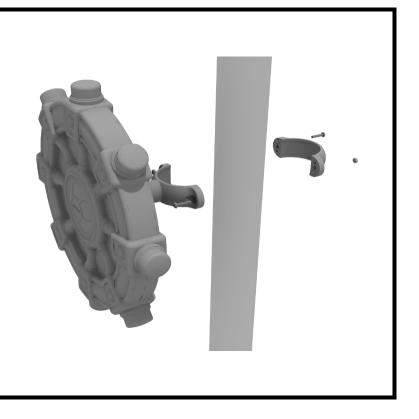

Detach half of the tube clamp connected to the Ships Wheel, and re-attach the clamp around the support post, as shown in the picture. Recommended install height is 20 to 36 inches above surfacing depending on age range.

We recommend using Threadlocking fluid on bolts connecting Ship's wheel to clamp to prevent hardware from loosening over time.
