

# Inground Post/Mount Installation

## STEP: 1

**DO NOT CEMENT POSTS/MOUNTS INTO PLACE UNTIL THE ENTIRE STRUCTURE IS ASSEMBLED.**

Refer to the General Installation guide footing size information and digging proper holes for the support posts/mounts.

# 8-Foot Spiral Slide Installation

## STEP: 1

Install posts according to the General Information Guide. After installing the posts, using one (1) M10\*35 bolt, two (2) M10 washers, and one (1) M10 lock nut, attach the deck to the pre-attached deck clamp, as shown in the image. Repeat this process for the other deck clamp.

## STEP: 2

Connect half of the 3.5-inch tube clamp to the guardrail using one (1) M8\*30 bolt. Set the guardrail into place, then attach the second half of the clamp using the hardware provided in the clamp bag.

# 8-Foot Spiral Slide Installation

## STEP: 3

Using two (2) M10\*25 bolts, four (4) M10 washers, and two (2) M10 lock nuts, connect the guardrail to the deck. Repeat steps 2 and 3 for the other guardrail.

## STEP: 4

Using two (2) M10\*25 bolts, four (4) M10 washers, and two (2) lock nuts, connect the handrail to the guardrail as shown. Set the bottom end of the handrail into footing. Information for digging footers can be found in the General Installation Guide.

# 8-Foot Spiral Slide Installation

## STEP: 5

Using one (1) M10\*25 bolt, two (2) M10 washers, and one (1) M10 lock nut, attach the top of the stairway to the deck on the opposite side of the posts. Repeat this step for remaining attachment points.

## STEP 6

Using three (3) M10\*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts, attach the bottom half of the stair to the top half of the stair.

# 8-Foot Spiral Slide Installation

## STEP: 7

See general installation guide footing information regarding installation of the stair middle support. Using two (2) M10\*25 bolts, four (4) M10 washers, and two (2) M10 lock nuts, attach one support to the stair. Repeat this process for the other stair support.

## STEP 8

Using one (1) M10\*25 bolt, two (2) M10 washers, and one (1) lock nut, attach one stair handrail bracket to the proper stair connection point. Repeat this process for the remaining connection points.

# 8-Foot Spiral Slide Installation

## STEP: 9

Using two (2) M10\*25 bolts, four (4) M10 washers, and two (2) M10 lock nuts, connect the bottom of the handrail to the stair.

## 3.5-inch Clamp Installation Examples

The following three pages will include examples of how to install some of the most common types of Clamps that are present on our structures that use 3.5-inch outside diameter posts. The structure that you are assembling might not require all the types of clamps listed in these examples.

The Install Guides for specific components that come later in this document might call for a specific type of clamp (a tube clamp for example), those sections will not include detailed instructions for the clamps and should direct you back to this section for more detailed information.

### 3.5-inch Flat Clamp Install Example

Connect half of the flat clamp to the component using one (1) M8\*40 bolt. Then, using the other half of the flat clamp and the hardware provided in the clamp hardware bag, attach the backside of the flat clamp around the post.

## 3.5-inch Clamp Installation Examples

### 3.5-inch Tube Clamp Install Example

Connect half of the clamp to the component using one (1) M8\*30 bolt. Then, using the other half of the tube clamp and the hardware provided in the clamp hardware bag, attach the backside of the tube clamp around the post.

### 3.5-inch 90-Degree Flat Clamp Install Example

Connect half of the flat clamp to one panel using one (1) M8\*40 bolt. Then, using the other half of the flat clamp and the hardware provided in the clamp hardware bag, attach the other half of the tube clamp around the post. Then, attach the next panel to the other side of the clamp using the same process.

## 3.5-inch Clamp Installation Examples

### 3.5-inch Double Slide Clamp Install Example

Connect half of the double slide clamp to the double slide hood using one (1) M8\*30 bolt. Then, using the other half of the clamp and the hardware provided in the clamp hardware bag, attach the backside of the double slide clamp around the post.

# Spiral Slide Installation

## STEP: 1

Attach the Spiral Slide Deck Support Post to the Spiral Slide Deck using two (2) M10\*25 Bolts, four (4) M10 Washers, and two (2) M10 Lock Nuts.

## STEP: 2

Connect the Spiral Slide Mount to the bottom of the Spiral Slide using four (4) M10\*20 Bolts, four (4) M10 Spring Gaskets, and four (4) M10 Washers. Refer to the General Installation Guide for information on slide footings.

# Spiral Slide Installation

## STEP: 3

See general installation guide regarding footing information for slides and support posts. Connect the Spiral Slide to the Spiral Slide Deck using three (3) M10\*20 Bolts, three (3) M10 Spring Gaskets, and three (3) M10 Washers.

## STEP: 4

Attach the Spiral Slide Handrail to the Spiral Slide Deck using five (5) M8\*60 Bolts, five (5) M8 Washers, five (5) M12 Washers, and five (5) M12 Inner Hex Nuts. Connect spiral slide panels to slide using four (4) M10\*50 bolts, eight (8) M10 washers, and four (4) M10 lock nuts for each panel. Connect the handrails to the posts using two (2) tube clamps. Repeat this process for the other handrail.
